DETAILED ACTION

1. This application has been examined. The claims 1-13 are allowed.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a thin electronic input device, comprising a film layer made of a flexible material; a conductive layer mounted on the film layer for sensing a human electric wave, and an IC control unit electrically connecting to the conducting layer; and a connecting unit electrically connecting to the conducting layer. The closest prior art of Sandbach et al. (US 2003/0011576) showed a similar invention, however, he fails to teach a single conducting layer mounted on the film layer, a cover layer mounted on the conducting layer; a character display layer mounted on the covering layer, the character display layer having a plurality of keyboard characters printed thereon, the conducting, covering, and character layers being non-displaceably mounted respective on said film layer, whereby said human electrical wave provides electrical input to said electronic input device when contacted by a carrier of human electrical wave as claims 1 and

5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
